## Speedball calligraphy pdf

nibs it's that I don't have to worry about applying a bit of force while cleaning/wiping the attached nib - because if the nib comes out of the pen holder, nothing is damaged! After the nib, everyone was designed to be removable. But conversely, when I wipe irremovable nibs of some of my art/art, I'm not going to do it. It happened to me before, when I was finished pulling out the 'irremovable' nib of an art pen from my body when I was wiping the nib. I tried putting back the nib, but the pen was already damaged — writing with it as it was never when it was in good shape. But yes, please still do handle these nibs with care! (especially the 101 nib that is so flexible that it spreads quite easily) I use J. Harbin's pen cleaning solution - 'Nettoyant Por Stylo' to clean nibs after use. Just just pour a little bit of liquid, dilute it with water and then soak up your nibs in there for about 5 minutes. An example of strokes drawn down by respective nibs is quite honestly, I find it a tad inconvenient to keep dipping nibs in ink often as it's not a loadable, but a plunge pen. But if you don't mind this bit of discomfort, the Speedball 6-Nib calligraphy letter set is actually quite a steal given its affordable price and good quality.
